

# Mira Vale

## Graphics Systems Engineer

Systems-focused engineer building compact rendering infrastructure, asset pipelines, and developer tooling.

**loc:** Northbridge, Testland

**env:** Linux / Wayland

**mail:** mira.vale@example.test

**git:** github.com/fake-mira-vale

### /// SKILLS

#### Graphics:

Vulkan

OpenGL

GLSL

SPIR-V

#### Languages:

C++

C

Lua

Python

#### Systems:

Linux

CMake

Git

Profiling

#### Tools:

RenderDoc

Ninja

Neovim

### /// EDUCATION

#### BSc Computer Graphics

Northbridge Institute of Computing

**Status:** Completed

### /// PROJECTS

#### Starling Render Lab (Lead Renderer)

Fictional renderer used to test bindless materials, transient resources, and GPU-driven scene submission.

C++

Vulkan

SPIR-V

CMake

#### PixelForge Asset Tool (Developer)

Small offline tool for validating meshes, materials, and texture metadata before import.

C++

Lua

CLI
