

Ivo Merin

Engine & Tools Programmer

Builds engine foundations and editor tooling with an emphasis on clean APIs, predictable ownership, and measurable performance.

loc: Harborline, Testland

env: Linux / Wayland

mail: ivo.merin@example.test

git: github.com/fake-ivo-merin

/// SKILLS

Build:

CMake Ninja Git Bash

Core:

C++ C Lua

Engine:

Vulkan OpenGL ECS

Asset Pipelines

/// EDUCATION

BSc Game Technology

Fictional Institute of Engine Technology

Status: Completed

/// ARCHITECTURE

Editor:

Experimental: true

Panels:

Viewport Scene Inspector Console

UI: Immediate mode

Philosophy: Small interfaces, explicit ownership, data-oriented hot paths

Renderer:

API: Explicit resource lifetime

Backend: Vulkan

Features:

Bindless textures Dynamic rendering

Validation

/// WORKFLOW

Build:

Debug RelWithDebInfo Release

Daily:

Implement Capture Measure Refactor

Review:

Compiler warnings Validation output

Frame captures

/// PROJECTS

Copper Engine (Engine Programmer)

Fictional C++ engine with an editor, asset database, renderer abstraction, and hot-reload experiments.

C++ Vulkan ImGui CMake
