

Nia Sol

loc: Cloudmere

env: Linux

Graphics Infrastructure Developer

mail: nia.sol@example.test

Infrastructure-minded graphics developer who enjoys turning complicated rendering state into inspectable data.

git: github.com/fake-nia-sol

/// SKILLS

Debug:

Validation Layers RenderDoc
Sanitizers

Graphics:

Vulkan OpenGL GLSL

Systems:

C++ C Linux CMake

/// EDUCATION

BSc Computer Science

Cloudmere School of Computing

Status: Completed

/// ENGINE PROFILE

Rendering:

API: Vulkan 1.3

Features:

Dynamic rendering
Descriptor indexing GPU markers

Presentation: Swapchain

ResourcePolicy:

Buffers:

Persistent staging Suballocation

Images:

Immutable when possible
Explicit format

Synchronization:

Declared dependencies
Validation-first

Version: 0.8-test

/// AVAILABILITY

Contract: true

OnSite: false

Relocation: false

Remote: true

/// PROJECTS

Glassbox Renderer (Graphics Engineer)

Fictional renderer where resources, passes, and synchronization metadata are represented as inspectable graph data.

C++ Vulkan Render Graph

Texture Ledger (Tools Programmer)

Synthetic asset tool for tracking texture ownership, format, dimensions, and material references.

C++ Lua CLI
