

Kiro Fen

Rendering Tools Engineer

Toolmaker focused on graphics workflows, reproducible test scenes, and automation around native C++ renderers.

loc: Redwood Test Sector
env: Linux / Wayland / Vulkan
mail: kiro.fen@example.test
git: github.com/fake-kiro-fen

/// SKILLS

Automation:

CMake Shell CI

Graphics:

Vulkan GLSL SPIR-V

Languages:

C++ Lua Python Bash

/// EDUCATION

BSc Software Engineering

Fictional University of Systems

Status: Completed

/// METRICS

AutomatedTests: 148

GPUBackends: 2

Headless: true

Reproducible: true

/// NOTES

- > All benchmark inputs are generated locally
- > No proprietary assets
- > No network requirement

/// PROJECTS

FrameSmith (Tools Engineer)

Synthetic toolchain that launches render tests, gathers frame statistics, and emits machine-readable summaries.

C++ Lua Bash Vulkan

Scene Seeds (Pipeline Engineer)

Procedural collection of fake scenes designed to exercise renderer edge cases without external assets.

Lua C++ Procedural
